Date: 19 May 2026
Our reference: 260601
Subject: **Announcement of legal merger effective 1 June 2026**

Dear Sir / Madam,

We are writing to inform you of an important organizational change within the Reddion Group. As of 1 June 2026, the legal merger between Post Luchtkanalen B.V. and Vink Systemen B.V. (trading as Vink Projects B.V.) will take effect, with both entities continuing as a single new entity: **Reddion Projects B.V.** We consider it important to inform you, as a valued partner, in a timely and comprehensive manner about what this merger entails, what will change for you, and – importantly – what will not.

Legal merger

The legal merger follows a statutory process in which two icons in the ventilation industry are absorbed into a single acquiring entity: **Reddion Projects B.V.** The merging companies will cease to exist as independent legal entities; all their rights, obligations and contracts transfer by law automatically and without any further action required – to the acquiring entity: Reddion Projects B.V. For you as a client, in practice this means that existing (framework) agreements, ongoing assignments, and contractual arrangements will remain in full force. No action or signature is required on your part.

Two project locations

As of 1 June, the former entities Post Luchtkanalen B.V. and Vink Systemen B.V. will continue as **independent project locations in Rosmalen and Katwijk.** Both project locations are independently capable of accepting tenders / requests and executing projects, in collaboration with you as client and any other partners. Both locations have their own project department and a KSW team (Klant/Client Specific Work), specifically equipped for urgent requests and custom solutions for one-off renovation and maintenance work where technical assessment and speed are essential. Operationally, nothing changes; each location retains its own identity, the same people, the same expertise, the same approach.

You can continue to submit your requests directly to the project locations as usual:

- Katwijk: Calculatie.Katwijk@reddion.com
- Rosmalen: Calculatie.Rosmalen@reddion.com

New: you can now also submit your requests centrally via calculatie@reddion.com. We will then ensure the right location assists you – so you are always connected to the right people.

Administrative changes

Our services continue without interruption, and your regular contacts remain available. We do ask that you update the administrative details in your systems before 1 June 2026. Invoices and payments must be processed under the new entity details from that date onwards.

Katwijk location

Entity	Reddion Projects B.V.
Address	Nijverheidstraat 1, Katwijk

For any questions about the merger and/or the related administrative changes, please contact us via fusie@reddion.com or administratie.projects@reddion.com. Any required (legal) documents and the latest status can be found at www.reddion.com/fusie.

Welcome to our facilities

In addition to the project locations, Reddion Group also operates two modern production facilities in Katwijk, The Netherlands and in Poznan, Poland. The facilities are equipped for the production from standard air ducts to high-grade air-technical custom components and will increasingly collaborate to serve a wide range of projects and clients.

Curious about our working methods or production processes? You are most welcome to visit our locations in Katwijk, The Netherlands and Poznan, Poland. We are happy to receive you by appointment. Please contact your regular contact person or send a message to info@reddion.com.

Our partnership: the foundation for the future

The merger into Reddion Projects B.V. is not merely an administrative step – it is a deliberate choice to combine our strengths and further enhance the services we provide for you. Clients retain their trusted partner and can now count on the pooling of expertise and capacity, unique sector specializations, and a stronger and more complete offering. Through this merger, Reddion is better positioned to deliver diverse projects and can invest more in people, equipment, and innovation.

We value our collaboration with you and look forward to strengthening our relationship. Our ambition is not merely to be your supplier, but to be your dedicated partner in air and ventilation technology – from standard components to complex, large-scale projects.

As a team, we also take a moment to reflect on the farewell to two icons that have shaped the ventilation industry in the Netherlands – Post Luchtkanalen and Vink Groep. A rich history and legacy to be proud of. We carry that pride into everything Reddion Projects B.V. will build. Together with you, we look ahead with great confidence.

Upcoming communications

On 1 June, a press release will be published through our (online) channels, officially announcing and explaining the merger. Our website has already been updated with current information about the merger into Reddion Projects B.V., the project locations, and contact details. This letter is also available there. For more information, visit www.reddion.com/fusie.

We hope to meet or welcome you to one of our locations soon, and look forward to further strengthening our collaboration.

We thank you for your trust in Reddion and in particular Reddion Projects.

Kind regards,

Reddion Projects B.V.

Wilbert Bekendam
